

Home networking, setting up wireless with security, hotspots in NSBAR area
with Eli Lampson

This class details secure set up of a home network, including wireless networks. Networking not only entails connecting to the internet, it enables you to easily share files between multiple computers, restrict and protect children's internet activities, and secure your personal information.

In this class, we cover the equipment you need for home networking and how to install it. After you have learned to create a network, you will learn how to set security policies to restrict others from using your network without permission.

We will follow up with hotspots in the NSBAR area; what they are, where they are and how to use them.

This free session is ONLY for NSBAR Members. If you are not a member, you may consider joining as a secondary member with NSBAR in order to attend our free membership appreciation classes.

Date: October 7th, 2010

450 Skokie Blvd Bldg 1200, Northbrook, IL 60062

Time: 10:00am – 11:30am

RSVP: education@nsbar.org or call (847) 480-7177 and ask for Rachel
