

Publisher 2003

Are you doing all you can to market your own business? Microsoft® Publisher 2003 is a full-featured desktop publishing program that helps you design and publish professional print and Web-based materials with ease. Greeting cards, brochures and fliers are just a few materials you will learn how to create. And once you pick up the basic skills you need to start and customize a publication, you'll be able to apply those same skills to the entire range of personal and business publication types now at your fingertips. Publisher makes it especially easy by giving you hundreds of professional designs to start from. Once you have started with the basic design we will save your personal creation as a template so you can add to it later.

Once you have finished this free tutorial, you should be ready to create excellent documents using Microsoft Publisher 2003.

Northbrook, May 29th from 10am – 11:30am

Barrington, August 12th, from 9am – 10:30am

Instructor: Steve Volkodav
